

Information packet

Variable descriptions

Variable	Description
YEAR	Year of surgery
Age	Patient's age at the time of the surgery
FEMALE	Patient's sex at birth (1 = female, 0 = male)
BMI	Patient's body mass index (BMI) at time of surgery
CharlsonScore	Patient's Charlson Comorbidity Index score (higher numbers indicate more comorbidities that could lead to death)
SurgeryType	This was meant to record the type of surgery (such as colostomy, ileostomy, or other procedures)
CHF	Does the patient have a history of congestive heart failure? (1 = yes, 0 = no)
VALVE	Does the patient have a history of peripheral vascular disease? (1 = yes, 0 = no)
RENLFAIL	Does the patient have a history of renal failure? (1 = yes, 0 = no)
LIVER	Does the patient have a history of liver disease? (1 = yes, 0 = no)
METS	Does the patient have cancer that has metastasized? (1 = yes, 0 = no)
TUMOR	Does the patient have a solid tumor that has <i>not</i> metastasized? (1 = yes, 0 = no)
COAG	Does the patient have coagulopathy (a blood clotting disorder)? (1 = yes, 0 = no)
OBESE	Is the patient obese? (Definition not specified; 1 = yes, 0 = no)
LYTES	Does the patient have fluid or electrolyte disorders? (1 = yes, 0 = no)
BLDLOSS	Does the patient have chronic blood loss anemia? (1 = yes, 0 = no)
ANEMDEF	Does the patient have a deficiency anemia? (1 = yes, 0 = no)
DRUG	Does the patient abuse drugs? (1 = yes, 0 = no)
SteroidHx	Did the patient use steroid drugs before surgery? (1 = yes, 0 = no)
ImmunosuppressantHx	Did the patient use immunosuppressive drugs before surgery? (1 = yes, 0 = no)
SurgDuration	Duration of the surgery, in minutes
Open	Type of surgery. 1 = open surgery, 0 = laparoscopic ("minimally invasive") surgery.
DelayedHealing	Was the patient's healing after surgery delayed? (1 = yes, 0 = no)

Variable	Description
TWATemp	Time weighted average of the patient's core temperature during surgery, °C
LastReadingTemp	Last recorded core temperature prior to surgery, °C
EndCaseTemp	Patient's core temperature at the end of surgery, °C
SeriousInfection	Did the patient develop a serious infection within 30 days of surgery? This includes the infections in the SSIDeep(fascia), SSIOrganSpace, AbsessIntraAb, AbsessPelvic, Cdiff, Pneumonia, Pneumonia(aspiration), and Sepsis variables. (1 = yes, 0 = no)
SuperficialInfection	Did the patient develop a superficial infection within 30 days of surgery? This includes the infections in the SSISuperficial(skin), WoundInfection, and FascialDehiscence variables, as well as perineal wound problems. (1 = yes, 0 = no)
DurationHosp	Time the patient stayed in the hospital after surgery, in days
LOS	Time the patient stayed in the hospital, including time before surgery, in days
DEAD	Did the patient die in the hospital? (1 = yes, 0 = no)

Summary of variables

Characteristic	N = 7,908 ^I
YEAR	
2009	1,177 (15%)
2010	1,091 (14%)
2011	1,346 (17%)
2012	1,471 (19%)
2013	1,436 (18%)
2014	1,387 (18%)
Age	56 (43, 68)
FEMALE	4,002 (51%)
SurgeryType	0 (NA%)
Unknown	7,908
BMI	25.7 (22.3, 29.7)
CharlsonScore	1.00 (0.00, 2.00)
CHF	274 (3.5%)
VALVE	446 (5.6%)
RENLFAIL	343 (4.3%)
LIVER	210 (2.7%)
METS	529 (6.7%)
TUMOR	1,537 (19%)
COAG	577 (7.3%)
OBESE	1,319 (17%)
LYTES	3,203 (41%)
SurgDuration	195 (135, 269)
Open	6,504 (82%)
TWATemp	36.00 (35.70, 36.40)
LastReadingTemp	36.30 (35.90, 36.80)
EndCaseTemp	36.40 (36.20, 36.70)
SeriousInfection	674 (8.5%)
SuperficialInfection	640 (8.1%)
DurationHosp	6.0 (5.0, 9.0)
LOS	6.0 (5.0, 9.0)
DEAD	34 (0.4%)

^In (%); Median (Q1, Q3)
